### DOORS & WINDOWS

One personnel door is situated on the nearside and to the rear of the unit so access is possible if situated on a road. Fitted with a digital keypad, the unit can be kept locked at all times allowing any of the men access without the need of any extra keys. This will also rule out any unwanted operatives using the facilities. A large toughened window to the canteen area and a smaller frosted window to the toilet/shower room, provide natural light in the unit. Both windows are protected by shutters, which are secured from the inside of the unit.

### TOILET & SHOWER ROOM

The Thetford toilet is situated so the cassette is accessed from the outside of the unit so hygiene is of the highest standard. The shower is run via the gas water heater and a hand basin is provided with hot and cold running water. Other fixtures include towel rails, mirror and emergency lighting.

### KITCHEN AREA

The kitchen units provide a 2.5M work surface that incorporate a full size sink and drainer with hot and cold running water. The matching doors are white vinyl wrapped to ensure long life and have catches for when the unit is in transit. A microwave oven\* is fitted integrally in a base unit to keep work surface to a maximum. Two wall units are provided for extra storage. Four 230v switched sockets are provided above and below the work surface. A tubular heater and guard are fitted for additional heating at the front of the unit.

## DIMENSIONS

- |    |                  |        |
|----|------------------|--------|
| 1: | Body length =    | 4.20 m |
| 2: | Overall length = | 5.60 m |
| 3: | Width =          | 2.00 m |
| 4: | Body height =    | 2.10 m |

### SEATING AREA

Permanent seating is provided for 4-6 men. Cushions are 100mm foam covered in durable vinyl for ease of cleaning. The benches have hinged top panels and can be used for extra storage. The table is made from 40mm high quality worktop that matches the kitchen. A tubular heater and guard provide sufficient heating in the canteen area.

### STORAGE

Two banks of 4 lockable steel cabinets are provided for the men's personal belongings and a matching full height locker for cleaning utilities (brush, mop and bucket). Extra storage space includes under the seating and in the nosecone on the nearside of the unit. Gas bottles are situated in the offside compartment of the nosecone.

### SECURITY

An AMS Mule is fitted to the underside of the chassis to prevent the unit being stolen. The coupling is fitted with a hitch lock supplied by the manufacturer. Both doors on the nosecone are fitted with locks and the personnel door has two extra dead locks. Windows are shuttered and secured from the inside of the unit.

\*A gas hob can be fitted as an optional extra
